

Why Choose Oberfields?

AMERICAN-MADE WORLD-CLASS MANUFACTURING

Oberfields is proud to be American-Owned and Made. We manufacture our products within our three manufacturing facilities in central Ohio, and employ over one hundred employees.

NETWORK OF DEALERS & AUTHORIZED CONTRACTORS

You can find our products throughout the Midwest, with direct sales locations in and around central Ohio. We have a valued distributor network who are knowledgeable about our products and have our products on display. We take great pride in providing in-depth regional training programs for contractors to become Authorized Oberfields Contractors. To connect with a distributor or authorized contractor in your area, please visit oberfields.com

EXPERIENCED PROFESSIONAL ADVICE

We are more than your supplier, we are your partner. We recognize the importance of sales support and inventory. We have a phenomenal team that's trained to be your resource. Our knowledgeable staff provides expertise from site design and installation techniques, to delivery.

ONE-SOURCE ORDERING

Pavers. Retaining Walls. Step Units. Natural Stone. Structures. Sealers and Cleaners. We've got you covered with one call.

**DURA
DENZ**

THE DURA-DENZ DIFFERENCE

Dura Denz is exclusive to Oberfields and represents a dramatic break-through in concrete casting technology. Our Americana Collection line of premium pavers are infused with Dura Denz. A specially formulated dense top layer that creates a smooth, extra-hard surface that resists chipping, scratching and fading. The result is products that are not only beautiful, but extremely durable

Find your authorized contractor & dealer today

Simply Open the camera app on your phone and scan the code to get in touch with our contractors/dealers.

Our goal is to provide you with quality paver & wall products for your project. We understand that it's a large investment. If you need help with finding the right contractor for your project, we can help. Our goal is to recommend qualified, knowledgeable, certified hardscape contractors. The hardscape contractors found on our Oberfields Authorized Contractor list have shown a proven knowledge on the basics of paver and retaining wall construction and installation. Each company listed has at least one individual on staff that has attended our two-day training course and passed our Certification Exam.

While we try our best to recommend qualified contractors for your project, Oberfields does not guarantee the workmanship of the installer. Please ask your selected contractor for references and about any warranty or guarantees they might provide on workmanship.

FOLLOW THESE STEPS TO SELECT THE IDEAL CONTRACTOR TO BRING YOUR PROJECT TO LIFE.

STEP ONE

It's always a good idea to interview several contractors and find the best match for your project and personality. The contractor you choose will be at your project for days or weeks. Talk about working hours, how many people to expect at the project, what kind of equipment they will be using. Make sure you have a good rapport with the person and communicate your wants and needs.

STEP THREE

Once you reward the project to a specific contractor, get a written contract of the work to be performed. Make sure you understand the scope of your project and that any changes midway through the project, could result in additional costs to the project.

STEP TWO

Once you decide on the work you want to complete, confirm that the contractor has done that type of work in the past. Ask for pictures, references, or go by other projects they have completed and make sure you are happy with their quality of work.

Make sure to ask if they are an Oberfields Authorized Contractor.

STEP FOUR

Once your project is complete, we would love to see finished photos! Photos can be submitted to Oberfields at **photos@oberfields.com**. Photos may be used in social media or future catalog publications.

Utilize our network of authorized contractors and dealers to build your happy place

We have a valued distributor network throughout the Midwest who are knowledgeable about our products and have our products on display. We take great pride in providing in-depth regional training programs for contractors to become Authorized Oberfields Contractors.

NEW FOR 2021!

WE ARE NOW OFFERING
GEOGRIDS & FABRICS!

The Difference Makers

Dura Denz penetrating sealers are offered in both water based and solvent based formulas. Each formula offers two finishes—a wet look and a matte look. Either finish adds enhancement and protection for years, with minimal maintenance.

SOLVENT BASED

- WET LOOK
- MATTE LOOK

WATER BASED

- WET LOOK
- MATTE LOOK

New Dura-Denz Polymeric Sand

Dura Denz Polymeric Sand is a joint stabilization sand that offers long lasting durability and superior strength when it comes to your pavement joints. Formulated with a blend of native sands and polymer binders; that once activated, allows the joints to expand and contract with the elements – such as freeze/thaw cycles. Dura Denz Poly Sand prevents sand erosion from pavement joints caused by rain and other water run-off, deters weed growth and insect infestation, and reduces overall pavement maintenance. You can be assured that Dura Denz Polymeric Sand will not discolor the surface or leave behind a haze, when installed correctly. Designed and tested in conjunction with the Americana Collection pavers; the Dura Denz Polymeric Sand, as well as Dura Denz Sealers, promotes a system sell of pavers; built to our specifications, delivering both on quality and consistency.

Granite

Tan

Best Practices

We adhere to ICPI System Practices

- After excavation, install geosynthetic fabric
- Install sub-base material (open graded 3/4" clean or dense 3/4" down to fines)
- Install bedding layer (clean limestone chip or dense concrete sand)
- Install Americana Collection paver
- Sweep in Dura Denz Polymeric Sand
- Clean patio in preparation of sealer
- Seal patio with Dura Denz All-In-One Sealer

Dura Denz Polymeric Sand is recommended for joints up to 3/4" (max). For best performance, install with a minimum depth of 1.5"

Available in two color options: Granite and Tan. Customers can expect our Granite to be richer and deeper in color than its counterparts in the market. This was done purposefully, to best compliment our rich gray tones within the Americana Collection.

1 bag = approximately 100 square feet, depending on paver style

New All-In-One Sealers

How many reasons do you need?

Our new Dura Denz All-In-One penetrating sealers enhance color and texture, stabilizes joint sand, and protect against mold, moss and algae. Formulated to resist UV rays, Dura Denz Sealers help to retain the pavers original color while also repelling water and stains. It can be applied immediately after installation on a clean, dry installation and is rain safe in 90 minutes.

Dura Denz Sealers are formulated to give maximum coverage for years. Although formulated in conjunction with the Americana Collection pavers, Dura-Denz Sealers may also be applied to any type of concrete paver, clay paver, flat and stamped concrete, and masonry surfaces such as concrete walls, exposed aggregate and retaining walls.

Make sure you ask your contractor about this very important last step to a professional grade finish. By committing to an easy maintenance plan, you can keep stains from penetrating your hardscape surface and make a world of difference to the look and longevity of your paver project!

TREADS / COPING
COLOR BLENDS:

Cuyahoga = golden buff, charcoal accent
Mohican = neutral tan, brown accent
Scioto = gray, charcoal accent

Color

The natural materials that we use in our paving stones and retaining wall products deliver a range of colors that closely match color samples in catalogs, spec books, color swatch books and online photos. However, Oberfields cannot guarantee exact color matching. Our pavers and walls can vary slightly in color depending on environmental conditions. Therefore, colors shown are approximate representations of standard colors and shouldn't be expected to be an exact match. Final color selections should be made at your local dealer from stock product or displays. Oberfields always recommends immediately verifying the product and color upon receipt. If there are any discrepancies, contact your local dealer before continuing your project. Installation of the product constitutes its acceptance. Proper installation enhances the overall color of pavement. Units should be randomly picked from at least two pallets when installing. This creates an attractive and subtle blending of color.

Efflorescence

Our warranty does not apply to efflorescence. Efflorescence is a whitish, powder like deposit that can appear on the surface of concrete pavers. When cement hydrates, calcium hydroxide is formed. A reaction occurs between the calcium hydroxide and carbon dioxide (from the air) to form water-insoluble calcium carbonate, which is then called efflorescence. Efflorescence does not have an effect on the structural performance or durability of the concrete pavers. Oberfields includes admixtures in their concrete pavers to help minimize efflorescence, but efflorescence is a natural occurrence in all concrete products. Oberfields does not warrant concrete pavers and/or walls that it manufactures against the appearance of efflorescence. Efflorescence may appear immediately or within months following installation. It may remain for months or some of it may wear away. Deposits may be removed from the concrete paver surface by using proprietary efflorescence removers. Before purchasing or applying any chemicals to remove deposits, please consult your local dealer for efflorescence removal chemicals.

Polymeric Haze

Polymeric haze from the use of polymeric joint sand may appear on your concrete products if the sand was not removed from the surface of the paver properly. This does not affect the integrity of the product or your installation. The hazing will weather away naturally with time and rain. It can be removed with a specialized cleaner; you are advised to contact your contractor or the polymeric sand company used for advice on recommendations. Oberfields accepts no responsibility or liability for this occurrence.

Construction Residue

A by-product of cutting with a saw is residue-filled water or concrete dust. Residue-filled water or re-hydrated dust can cling to the surface and leave a concrete stain. It is recommended to wash and remove the water or concrete dust from the surface of the pavers before it dries. Construction residue can also happen through soil disturbance or environmental elements. These contaminants should be removed immediately but do not affect the integrity of the product or your installation. Oberfields accepts no responsibility or liability for these occurrences.

Compactor and Snow Removal

Oberfields pavers with textured surfaces have high and low points on the surface that give it more of an aesthetic appeal. However, pavers with textured surfaces are susceptible to surface scuffing when they are compacted into place. Therefore, these types of pavers should always be compacted with plate compactors that incorporate a protective mat or other medium between the plate compactor and the surface of the Oberfields pavers. This system will help ensure that paver surface scuffing is kept to a minimum. These protective mediums include: rubber matting, thin carpet or cardboard. Manufacturers of plate compactors are able to recommend other products that can also be used for this purpose. For further information on interlocking concrete paver details, technical information, and recommended construction practices, visit ICPI at icpi.org.

Hardscape Lifetime Limited Warranty

Oberfields backs our manufactured paver and wall products with a lifetime limited warranty, guaranteeing our products against manufacturing defects. This warranty is for residential construction only, and is applicable where products have been correctly installed to meet industry specifications. Color variations and the appearance of efflorescence do not constitute a warranty claim. Any defective products will be replaced; however, replacement labor and transportation costs are not included in this warranty. All warranty claims must be made prior to the removal or disposal of the defective product. We will honor this warranty with a proof of purchase (invoice or delivery ticket.) The foregoing warranty is exclusive and in lieu of all other express or implied warranties of any kind. Furthermore, Oberfields disclaims all implied warranties of merchantability as well as all implied warranties of fitness for a particular purpose. Oberfields shall not be liable for any consequential damages or incidental damages arising from any warranty claim made against it.

NOTE: This warranty does not apply to any breakage, chipping, or other deterioration that was caused by improper design or installation which does not comply with applicable codes, the ICPI, NCMA, and recognized work procedures. Please visit icpi.org or ncma.org for more information on installation specifications. This warranty does not apply to any damage resulting from a natural disaster or from a deliberate and/or negligent act on the part of the purchaser, owner of the building, installer or any third party.
