SPEC-BRIK®

For specifications, color rendering software, and more information, please visit www.concreteproductsgroup.com

Spec-Brik® provides architects, developers and contractors with a cost effective, convenient masonry option.

SPEC-BRIK® Advantages:

- Increased speed of construction.
- Wide variety of colors that look like brick.
- Nationwide availability.
- Now featuring Water Control Technology for dry single wythe walls.
- Energy efficient.
- Mold and fire resistant.
- Smooth, brick like textures.
- Minimal maintenance required.
- Produced locally, readily available, assuring quick delivery.
- These benefits make Spec-Brik® an attractive and logical alternative to other wall systems.

Spec-Brik® is manufactured to job specifications and delivered quickly.

Spec-Brik®, your first choice for an economical, load-bearing wall system.

Now available with WATER CONTROL TECHNOLOGY™ built in for superior resistance to moisture penetration!

Water Control Technology is an innovative new masonry unit design that resists moisture penetration by diverting water downward into the wall's drainage system.

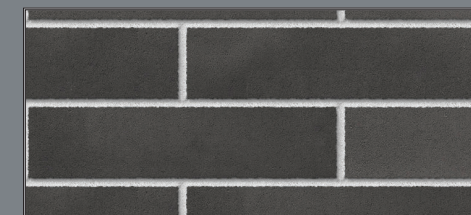

Ask your sales representative for more information!
