OBERFIELDS LLC and LEED<sup>®</sup> Under building materials MR Credit 4.1 and 4.2, **LIGHT WEIGHT CMU** from our **OBETZ**, Ohio plant incorporate slag cement GGBFS ASTM C989 to replace Portland cement. **Our gray units achieve 46.9% pre-consumer recycled content** per NCMA TEK bulletin 6.6B “Determining the Recycled Content of Concrete Masonry Products.” We meet a specification worded as follows, *“Provide concrete masonry products with an average recycled content so post-consumer content plus one-half of pre-consumer recycled content is not less than 20%.”*

46.3% crushed and graded limestone from Delaware, Ohio, 41 miles from our plant.

42.7% expanded shale fines lightweight aggregate, Haydite A, which is a 100% pre-consumer, recycled content product called Haydite, from DiGeronimo Aggregates in Independence, Ohio, 125 miles from our plant.

3.3% Slag cement, Ground Granulated Blast Furnace Slag, which is a 100% pre-consumer, recycled content product, from Detroit, Michigan, 170 miles from our plant.

7.7% Portland cement, which is a 10.6% pre-consumer recycled content product, from Fairborn, Ohio, 68 miles of our plant.

To obtain a copy of NCMA TEK bulletin 6.6B contact Ed Gebauer at phone or email below.
