OBERFIELDS LLC and LEED® Under building materials MR Credit 4.1 and 4.2, **NORMAL WEIGHT High-Strength CMU** from our **OBETZ** Ohio plant incorporate slag cement GGBFS ASTM C989 to replace Portland cement. **Our gray units achieve 42.2% pre-consumer recycled content** per NCMA TEK bulletin 6.6B “Determining the Recycled Content of Concrete Masonry Products” as described on page 5 of 8, section titled “For a Product.” We meet a specification worded as follows, *“Provide concrete masonry products with an average recycled content so post-consumer content plus one-half of pre-consumer recycled content is not less than 20%.”*

35% ground granulated blast furnace slag cement	65% Portland cement
100% pre-consumer recycled content	10.6% pre-consumer recycled content
from Detroit MI. 170 miles to our plant	from Fairborn OH. 68 miles to our plant

To obtain a copy of NCMA TEK bulletin 6.6B contact Ed Gebauer at phone or email below. To learn more Slag Cement GGBFS visit the Slag Cement Association. www.slagcement.org OBERFIELDS LLC is committed to contributing to the growth and advancement of society by providing innovative, superior quality materials and services to the construction environment. We share in the responsibility for our environment and seek to supply building products which contribute to relevant credits for the LEED green building rating system. Masonry is impressive, sustainable for generations, protects against fire, resilient against disaster, insects, rot, mold, and has thermal mass energy benefit.
