

Flashing and Reglets

Copper-Fabric™ SA

Self Adhering Copper Fabric Flashing

Material:

Copper sheet used in the fabrication of copper laminates conforms to ASTM B370 (110 Alloy).

Copper-Fabric™ SA Self-Adhering Copper Fabric Flashing Is a composite membrane consisting of a polyethylene film laminated to a 3, 5, or 7 oz. copper sheet to create a superior flashing that can also serve as a drip edge. It has a pressure-sensitive, clear adhesive that will not drool when exposed to UV or heat.

- Suitable for thru-wall or surface-mount usage.
- Available with 3, 5, or 7 oz. copper sheet.
- UV-resistant for up to 180 days.
- Highly resistant to oils and will repel most chemicals
- Extremely tough, with excellent impact and tear resistance.
- Maintains flexibility in extreme heat or cold weather environments.
- Asphalt-free composition compatible with a wide variety of sealants
- Available in widths from 12" 36", other widths available upon request
- * Please refer to Hohmann & Barnard installation instructions for more information.

Width: (25 ft. rolls)
☐ 12" ☐ 20" ☐ 32"
☐ 16" ☐ 24" ☐ 36"
