

A Construction Checklist

This list reviews the construction of interlocking concrete pavements

Job Planning and Layout

- Check underground utility locations
- Estimate Excavation
- Estimate: Base Material, Edge Restraints, Sand, Pavers, Edge Pavers
- Plan Materials, delivery, flow of materials, and equipment required
- Layout job on site; area to be paved, edges, access, material and equipment storage

Soil and Base

- Excavate soil and unsuitable material
- Compact Soil
- Install drainage and site utilities as applicable
- Plan base material
- Measure base compaction
- Measure base elevations

Sand

- Check bedding and joint sand gradation
- Place and screed sand

Pavers

- Pull or snap lines
- Lay pavers in desired pattern
- Cut and place edge units
- Compact pavers
- Remove defective units
- Fill joints with sand
- Vibrate/compact joints sand
- Check joints for fullness
- Remove excess sand
- Check surface elevation
- Clean and seal pavers as required
- Clean up site

Edge Restraint

- Install edge restraints
