Scioto Blend

Coping Pallet

- Pallet weight = ±1,550 lbs (incl. pallet weight)
- Coverage = 66 linear feet per Pallet
- Section = 11 linear feet per 1 layer

Coping blocks are provided in five basic sizes. There are three standard coping blocks which are finished on the front, back, and top faces. The standard coping blocks are tapered approximately 1" on each side from the front to the back of the block. There are also two end units which are finished on front, back, top, and one of the sides. The other side is tapered approximately 1" from the front to the back of the block. The end units are useful for constructing corners and ends. There are multiple face/texture patterns for each basic block size, providing a more random look for your finished project.

Dimensional Coping is also an option for capping the Belvedere Wall. Average block weights of the different face/texture patterns are shown. Weights of individual blocks may vary.
