Simply... the best

Each job, each customer, each and every day ... our approach is the same. We use the best materials. We strive to treat the customer the way we want to be treated.

*Take Life Outdoors*

Making outdoor spaces livable is more than a design trend to us. The outdoors is the perfect place to relax, unwind and connect with family. It puts us more in touch with God and his creation. Our tagline is truly meaningful to us, and we hope that our structures help you *take life outdoors.*“
Classic, Carefree Vinyl

Durable and beautiful, vinyl requires very little attention. Regular cleaning with a mild dish detergent or similar product is normally all that’s required to keep your structure looking its best.

- Contains 50 percent recycled material
- Made in the U.S.A.
- Won’t crack, fade or chalk
- Easy to assemble (We’ll assemble if you prefer.)
Naturally Beautiful Wood

Top-grade, treated lumber protects your structure from the elements. Our structures are made from hand-selected southern yellow pine.

- Pressure-treated to resist decay
- Air-dried after treatment for enhanced durability
- Harvested in the U.S.A.
- Milled to exact specifications
- All wood posts laminated to avoid warping; laminations are visible
- Easy to assemble (We'll assemble if you prefer.)

*Weathers over time; cracking, checking and splitting are expected and add to the natural appearance.*
Inside every vinyl post is a 6” x 6” wood post for reinforcement, with the exception of Savannah posts, which have a 4” x 4” inside.

Beams have a treated 2” x 8” inside the vinyl sleeve.

Purlins notched onto beams.

Simpson post brackets for every post.

Braces add stability for larger pergolas and high-wind locations.
Urbana

Crisp, clean lines. The Urbana vinyl pergola complements your home with classic styling.

Vinyl Gazebo Standard Features

**Cupolas**
Attractive cupolas are standard on most of our vinyl gazebo models.

**Beaded Vinyl Ceiling**
These ceilings not only enhance the appearance of your gazebo, but also allow for a quick springtime cleanup.

**Coated Stainless Steel Roof Reinforcement Plate**
Powder-coated stainless steel top-plate brackets strengthen the gazebo’s roof while remaining visually unobtrusive.

**Vinyl Clad Posts**
Beneath the maintenance-free vinyl is a solid 4” x 4” treated post that strengthens our gazebos for decades to come.

**Octagon Floor Clubhouse Decking**
Our floors are purposefully built in an attractive octagon shape, enhancing visual appeal while allowing for more efficient delivery and construction. Secured with stainless steel screws, these floors will stand up to the elements season after season.
Wood Gazebo Standard Features

Kiln-Dried, #1 Grade Lumber
Our lumber is kiln dried at the mill, then dried a second time after pressure treatment. This greatly reduces cracking and splitting.

Cedar Underside Sheathing
Top-quality cedar is found on the underside of each gazebo’s roof. Its natural grain amplifies the rustic feel of our wood gazebos.

Roof Reinforcement Plates
Powder-coated stainless steel top-plate brackets strengthen the gazebo’s roof while remaining visually unobtrusive.

Laminated Posts
Our wood gazebo posts are laminated for added strength and durability that exceeds a standard 4” x 4” post.

Octagon Floor Plan
Our floors are purposefully built in an attractive octagon shape, enhancing visual appeal while allowing for more efficient delivery and construction. Like the other parts of the gazebo, these kiln-dried floors are built to last year after year.
