Dura Denz represents a dramatic break-through in concrete casting technology. Our new world-class manufacturing process results in exceptional products that are infused with Dura Denz Technology. A specially formulated dense top layer creates a smooth, extra-hard surface that resists chipping, scratching and fading. The result is products that are not only beautiful, but extremely durable. Exceed your clients expectations when you feature products manufactured with Dura Denz Technology. Quite frankly, it’s unlike anything you’ll find on the market.

Call your Oberfields representative today. Because quality matters.

**Coping Pallet**

- **Coverage = 66 linear feet per Pallet**
- **Section = 11 linear feet per 1 layer**

Coping blocks are provided in five basic sizes. There are three standard coping blocks which are finished on the front, back, and top faces. The standard coping blocks are tapered approximately 1” on each side from the front to the back of the block. There are also two end units which are finished on front, back, top, and of the sides.

The other side is tapered approximately 1” from the front to the back of the block. The end units are useful for constructing corners and ends. There are multiple face/texture patterns for each basic block size, providing a more random look for your finished project.

Dimensional Coping is also an option for capping the Belvedere Wall. Average block weights of the different face/texture patterns are shown. Weights of individual blocks may vary.
DIMENSIONAL*

PRODUCT SPECS
a) Dimensional Wall Straight Block* – 12” x 8” x 4”
b) Dimensional Wall Wedge Block* – 12” x 8” x 4”

APPLICATIONS
Garden walls, freestanding walls, columns and edging.

KODAH*

PRODUCT SPECS

Product | Dimensions | Packaged together
--- | --- | ---
Kodah Wall* | 12" x 10.5" x 6" | 6
Kodah Wall* | 21" x 10.5" x 6" |
Kodah Wall* | 30" x 10.5" x 6" |
Kodah Wall* | 42" x 10.5" x 6" |
Kodah Wall Corner* | 21" x 10.5" x 6" |

APPLICATIONS

Garden walls, gravity walls, freestanding walls, columns and edging.

INSTALLATION

Engineered Retaining Wall | Freestanding Wall
--- | ---

Kodah Freestanding Wall Blocks are provided in four basic sizes. The blocks are finished on both the front and back faces of the wall blocks and they are tapered on each side approximately 1 1/2" from the front to the back of the block. There are multiple texture patterns for each basic block size to provide a more random look for your finished project. Average block weights of the different texture patterns are shown. Weights of individual blocks may vary.

The Kodah Collection contains two corner blocks. These blocks are finished on three sides, and the fourth side is tapered to fit with the other retaining wall and freestanding wall blocks. The corner blocks can be used to construct columns, provide a finished end on a freestanding wall, and make 90° corners. There are multiple texture patterns for the faces of both corner blocks, thus providing a more random look for your finished project. Average block weights of the different texture patterns are shown. Weights of individual blocks may vary.

EDINGTON®
FIRE PIT KIT

OVERALL DIMENSIONS
12" H x 48" Diameter
Weight - 1083 lbs. (1 pallet)

KIT COMPONENTS

• 39 Edington Wall Stone Wedge Units
• 3 - 10 oz. Tubes of Paver Bond
• Steel Ring
• Optional Grill Grate
• Optional Precast Rockface Caps

Build a fire pit in no time with our Edington Fire Pit Kit. Place base units on 4-6" of prepared compacted base and adhere units as you construct. Great for small fires, roasting marshmallows and hot dogs.

COLORS

Canyon Creek  Charcoal  Desert Sand  Earth  Flagstone  Quarry Stone

DIMENSIONAL FIRE PIT KIT*

OVERALL DIMENSIONS
12" H x 44"W x 44"D
Weight - 1136 lbs. (1 pallet)

KIT COMPONENTS
• 36 Dimensional Units
• 3-10 oz. Tubes of Adhesive
• Steel Liner
• Square Fire Pit Pallet: 1,130 lbs

The Dimensional Wall Fire Pit Kit features hand-hewn stone texture with consistent dimensions to create a natural looking square fire pit.

Due to variations in printing, color selections should always be chosen from actual product samples.
*Not available in MI.
KODAH FIRE PIT KIT*

OVERALL DIMENSIONS
12" H x 44" W x 48" D
Weight - 1682 lbs. (1 pallet)

KIT COMPONENTS
• 16 Kodah Corner Units
• 3-10 oz. Tubes of Adhesive
• Steel Liner

The Kodah fire pit features modern, linear proportions. The freshly quarried stone texture complements a variety of applications. It is designed for fast installation with large blocks and perfectly planned construction.

* Measurement at top of arch.  
** Height Extension Kit adds 6 inches to overall height. The kit also adds 320-1512 lbs depending on the width of the FireRock.

Quick Installation:

1. Set base plate on non-combustible foundation.
2. Place centerbacks along rear of base plate and build smoke chamber.
3. Install firebrick and fireplace is complete.

* All random lays are not a pattern. Random lays can consist of any grouping of the pavers. See Oberfields.com for larger format printouts.
Color
The natural materials that we use in our paving stones and retaining wall products deliver a range of colors that closely match color samples in catalogs, spec books, color swatch books and online photos. However, Oberfields cannot guarantee exact color matching. Our pavers and walls can vary slightly in color depending on environmental conditions. Therefore, colors shown are approximate representations of standard colors and shouldn’t be expected to an exact match. Final color selections should be made at your local dealer from stock product or displays. Oberfields always recommends immediately verifying the technical information, and recommended construction practices, visit ICPI at icpi.org.

Plate compactors are able to recommend other products that can also be used for this purpose. For further information on interlocking concrete paver details, ensure that paver surface scuffing is kept to a minimum. These protective mediums include: rubber matting, thin carpet or cardboard. Manufacturers of compactors that incorporate a protective mat or other medium between the plate compactor and the surface of the Oberfields pavers. This system will help surfaces are susceptible to surface scuffing when they are compacted into place. Therefore, these types of pavers should always be compacted with plate compactors.

Concrete stain. It is recommended to wash and remove the water or concrete dust from the surface of the pavers before it dries. Construction residue can also be a by-product of cutting with a saw is residue-filled water or concrete dust. Residue-filled water or re-hydrated dust can cling to the surface and leave a concrete staining. Efflorescence is a whitish, powder like deposit that can appear on the surface of concrete pavers. When cement hydrates, calcium hydroxide is formed. A reaction occurs between the calcium hydroxide and carbon dioxide (from the air) to form water-insoluble calcium carbonate, which is then called efflorescence. Efflorescence does not have an effect on the structural performance or durability of the concrete pavers. Oberfields includes admixtures in their concrete pavers to help minimize efflorescence, but efflorescence is a natural occurrence in all concrete products. Oberfields does not warrant concrete pavers and/or walls that it manufactures against the appearance of efflorescence. Efflorescence may appear immediately or within months following installation. It may remain for months or some of it may wear away. Deposits may be removed from the concrete paver surface by using proprietary efflorescence removers. Before purchasing or applying any chemicals to remove deposits, please consult your local dealer for efflorescence removal chemicals.

Polymeric Haze
Polymeric haze from the use of polymeric joint sand may appear on your concrete products if the sand was not removed from the surface of the paver properly. This does not affect the integrity of the product or your installation. The hazing will weather away naturally with time and rain. It can be removed with a specialized cleaner; you are advised to contact your contractor or the polymeric sand company used for advice on recommendations. Oberfields accepts no responsibility or liability for this occurrence.

Construction Residue
A by-product of cutting with a saw is residue-filled water or concrete dust. Residue-filled water or re-hydrated dust can cling to the surface and leave a concrete stain. It is recommended to wash and remove the water or concrete dust from the surface of the pavers before it dries. Construction residue can also happen through soil disturbance or environmental elements. These contaminants should be removed immediately but do not affect the integrity of the product or your installation. Oberfields accepts no responsibility or liability for these occurrences.

Compactor and Snow Removal
Oberfields pavers with textured surfaces have high and low points on the surface that give it more of an aesthetic appeal. However, pavers with textured surfaces are susceptible to surface scuffing when they are compacted into place. Therefore, these types of pavers should always be compacted with plate compactors that incorporate a protective mat or other medium between the plate compactor and the surface of the Oberfields pavers. This system will help ensure that paver surface scuffing is kept to a minimum. These protective mediums include: rubber matting, thin carpet or cardboard. Manufacturers of plate compactors are able to recommend other products that can also be used for this purpose. For further information on interlocking concrete paver details, technical information, and recommended construction practices, visit ICPI at icpi.org.

Hardscape Lifetime Transferable Warranty
Oberfields backs our manufactured paver and wall products with a lifetime limited warranty, guaranteeing our products against manufacturing defects. This warranty is for residential construction only, and is applicable where products have been correctly installed to meet industry specifications. Color variances and the appearance of efflorescence do not constitute a warranty claim. Any defective products will be replaced; however, replacement labor and transportation costs are not included in this warranty. All warranty claims must be made prior to the removal or disposal of the defective product. We will honor this warranty with a proof of purchase (invoice or delivery ticket.) The foregoing warranty is exclusive and in lieu of all other express or implied warranties of any kind. Furthermore, Oberfields disclaims all implied warranties of merchantability as well as all implied warranties of fitness for a particular purpose. Oberfields shall not be liable for any consequential damages or incidental damages arising from any warranty claim made against it.

NOTE: This warranty does not apply to any breakage, chipping, or other deterioration that was caused by improper design or installation which does not comply with applicable codes, the ICPI, NCMA, and recognized work procedures. Please visit icpi.org or ncma.org for more information on installation specifications. This warranty does not apply to any damage resulting from a natural disaster or from a deliberate and/or negligent act on the part of the purchaser, owner of the building, installer or any third party.
