# NEW DURA DENZ PRODUCTS AVAILABLE

## POLYMERIC SAND

Our Dura Denz Polymeric Sand will minimize sand erosion from pavement joints, deters weed growth, insect infestation and reduces overall pavement maintenance. **Dura Denz polymeric sand is available in two colors: Tan & Granite.**

## ALL-IN-ONE SEALER

How do you go about keeping your new paver project looking its absolute best? By sealing it with a Dura Denz All-In-One Penetrating Sealer, uniquely formulated in conjunction with the Americana Collection pavers to enhance, protect, and stabilize your paver project. **Dura Denz penetrating sealers are offered in both Water Based and Solvent Based formulas - Matte and Wet-Look finishes: 1-gallon & 5-gallon sizes.**

## BEST PRACTICES

**We adhere to ICPI System Practices.**

- After excavation, install geosynthetic fabric
- Install sub-base material (open graded 3/4" clean or 3/4" down to fines)
- Install bedding layer (clean limestone chip or concrete sand)
- Install Americana Collection paver
- Sweep in Dura Denz Polymeric Sand
- Clean patio in preparation of sealer
- Seal patio with Dura Denz All-In-One Sealer

Dura Denz is exclusive to Oberfields and represents a dramatic break-through in concrete casting technology. Our Americana Collection line of premium pavers are infused with Dura Denz. A specially formulated dense top layer that creates a smooth, extra-hard surface that resists chipping, scratching and fading. The result is products that are not only beautiful, but extremely durable.

Call your Oberfields representative today.  
**Because quality matters.**

### Coping Pallet

- Pallet weight = ±1,550 lbs (incl. pallet weight)
- Coverage = 66 linear feet per Pallet
- Section = 11 linear feet per 1 layer

Coping blocks are provided in five basic sizes. There are three standard coping blocks which are finished on the front, back, and top faces. The standard coping blocks are tapered approximately 1" on each side from the front to the back of the block. There are also two end units which are finished on front, back, top, and one of the sides.

The other side is tapered approximately 1" from the front to the back of the block. The end units are useful for constructing corners and ends. There are multiple face/texture patterns for each basic block size, providing a more random look for your finished project.

Dimensional Coping is also an option for capping the Belvedere Wall. Average block weights of the different face/texture patterns are shown. Weights of individual blocks may vary.

# Dimensional Wall\*

# Kodah Wall\*

Packaged Together

## APPLICATIONS

Garden walls, gravity walls, freestanding walls, columns and edging.

## INSTALLATION

### Engineered Retaining Wall

### Freestanding Wall

## BLOCK DETAILS

STONE & BUNDLING	Unit Dimensions L" x W" x H"	Units/ Cube	Weight/ Stone lbs.	
Freestanding Wall Pallet	Block 1	42" x 10.5" x 6"	6	200±
	Block 2	30" x 10.5" x 6"	3	140±
	Block 3	21" x 10.5" x 6"	6	100±
	Block 4	12" x 10.5" x 6"	3	50±
Corner Pallet	Block 5	21" x 10.5" x 6"	16	100±

Kodah Freestanding Wall Blocks are provided in four basic sizes. The blocks are finished on both the front and back faces of the wall blocks and they are tapered on each side approximately 1 1/2" from the front to the back of the block. There are multiple texture patterns for each basic block size to provide a more random look for your finished project. Average block weights of the different texture patterns are shown. Weights of individual blocks may vary.

The Kodah Collection contains two corner blocks. These blocks are finished on three sides, and the fourth side is tapered to fit with the other retaining wall and freestanding wall blocks. The corner blocks can be used to construct columns, provide a finished end on a freestanding wall, and make 90° corners. There are multiple texture patterns for the faces of both corner blocks, thus providing a more random look for your finished project. Average block weights of the different texture patterns are shown. Weights of individual blocks may vary.

\* All random lays are not a pattern. Random lays can consist of any grouping of the pavers. See Oberfields.com for larger format printouts.

## Color

The natural materials that we use in our paving stones and retaining wall products deliver a range of colors that closely match color samples in catalogs, spec books, color swatch books and online photos. However, Oberfields cannot guarantee exact color matching. Our pavers and walls can vary slightly in color depending on environmental conditions. Therefore, colors shown are approximate representations of standard colors and shouldn't be expected to be an exact match. Final color selections should be made at your local dealer from stock product or displays. Oberfields always recommends immediately verifying the product and color upon receipt. If there are any discrepancies, contact your local dealer before continuing your project. Installation of the product constitutes its acceptance. Proper installation enhances the overall color of pavement. Units should be randomly picked from at least two pallets when installing. This creates an attractive and subtle blending of color.

## Efflorescence

Our warranty does not apply to efflorescence. Efflorescence is a whitish, powder like deposit that can appear on the surface of concrete pavers. When cement hydrates, calcium hydroxide is formed. A reaction occurs between the calcium hydroxide and carbon dioxide (from the air) to form water-insoluble calcium carbonate, which is then called efflorescence. Efflorescence does not have an effect on the structural performance or durability of the concrete pavers. Oberfields includes admixtures in their concrete pavers to help minimize efflorescence, but efflorescence is a natural occurrence in all concrete products. Oberfields does not warrant concrete pavers and/or walls that it manufactures against the appearance of efflorescence. Efflorescence may appear immediately or within months following installation. It may remain for months or some of it may wear away. Deposits may be removed from the concrete paver surface by using proprietary efflorescence removers. Before purchasing or applying any chemicals to remove deposits, please consult your local dealer for efflorescence removal chemicals.

## Polymeric Haze

Polymeric haze from the use of polymeric joint sand may appear on your concrete products if the sand was not removed from the surface of the paver properly. This does not affect the integrity of the product or your installation. The hazing will weather away naturally with time and rain. It can be removed with a specialized cleaner; you are advised to contact your contractor or the polymeric sand company used for advice on recommendations. Oberfields accepts no responsibility or liability for this occurrence.

## Construction Residue

A by-product of cutting with a saw is residue-filled water or concrete dust. Residue-filled water or re-hydrated dust can cling to the surface and leave a concrete stain. It is recommended to wash and remove the water or concrete dust from the surface of the pavers before it dries. Construction residue can also happen through soil disturbance or environmental elements. These contaminants should be removed immediately but do not affect the integrity of the product or your installation. Oberfields accepts no responsibility or liability for these occurrences.

## Compactor and Snow Removal

Oberfields pavers with textured surfaces have high and low points on the surface that give it more of an aesthetic appeal. However, pavers with textured surfaces are susceptible to surface scuffing when they are compacted into place. Therefore, these types of pavers should always be compacted with plate compactors that incorporate a protective mat or other medium between the plate compactor and the surface of the Oberfields pavers. This system will help ensure that paver surface scuffing is kept to a minimum. These protective mediums include: rubber matting, thin carpet or cardboard. Manufacturers of plate compactors are able to recommend other products that can also be used for this purpose. For further information on interlocking concrete paver details, technical information, and recommended construction practices, visit ICPI at [icpi.org](http://icpi.org).

## Hardscape Lifetime Limited Warranty

Oberfields backs our manufactured paver and wall products with a lifetime limited warranty, guaranteeing our products against manufacturing defects. This warranty is for residential construction only, and is applicable where products have been correctly installed to meet industry specifications. Color variations and the appearance of efflorescence do not constitute a warranty claim. Any defective products will be replaced; however, replacement labor and transportation costs are not included in this warranty. All warranty claims must be made prior to the removal or disposal of the defective product. We will honor this warranty with a proof of purchase (invoice or delivery ticket.) The foregoing warranty is exclusive and in lieu of all other express or implied warranties of any kind. Furthermore, Oberfields disclaims all implied warranties of merchantability as well as all implied warranties of fitness for a particular purpose. Oberfields shall not be liable for any consequential damages or incidental damages arising from any warranty claim made against it.

**NOTE:** This warranty does not apply to any breakage, chipping, or other deterioration that was caused by improper design or installation which does not comply with applicable codes, the ICPI, NCMA, and recognized work procedures. Please visit [icpi.org](http://icpi.org) or [ncma.org](http://ncma.org) for more information on installation specifications. This warranty does not apply to any damage resulting from a natural disaster or from a deliberate and/or negligent act on the part of the purchaser, owner of the building, installer or any third party.
