

VERSA-LOK[®]

Weathered Series[™] **Mosaic**[™] Retaining Wall System

VERSA-LOK's Weathered[™] Series retaining wall systems represent the ultimate combination of aesthetics and performance. Unlike other retaining wall products, these units undergo a special "weathering" process to create a rustic old-world appearance that closely resembles natural stone.

Three different unit sizes are used to create a random appearance similar to natural stone walls.

Behind the beauty, VERSA-LOK incorporates a unique hole-to-slot pin interlock system and more than a decade of experience into systems unmatched in installation simplicity and structural integrity.

The Mosaic[™] Retaining Wall System utilizes units of varying heights and widths to achieve a random-like pattern. While complicated in appearance, installation is amazingly simple. Like all VERSA-LOK products, units are easily assembled without mortar, require no concrete footings, and are environmentally safe.

Matching concrete caps provide the finishing touch to the Mosaic Retaining Wall System.

VERSA-LOK[®]

VERSA-LOK Mosaic is comprised of three retaining wall units – VERSA-LOK Standard, VERSA-LOK Cobble™, and VERSA-LOK Accent™. (Each unit type may also be used alone to construct attractive landscaping features.) One Standard, one Cobble, and two Accent units are arranged in “panels” that are 10 inches high and 24 inches wide. There are four different panel configurations which can be arranged in any order to form a random appearance.

IMPORTANT Maximum height for an unreinforced Mosaic retaining wall is four feet. Individual site, soil, and loading conditions (including terraces) may limit unreinforced wall height to less than four feet. Taller walls require soil reinforcement and engineering assistance. Before constructing a retaining wall, please contact your local VERSA-LOK representative for complete *Mosaic Design and Installation Guidelines* or call us toll free at (800) 770-4525.

Mosaic retaining walls can feature a variety of design elements like curves, corners, and steps.

The table below may be useful for estimating quantities of Mosaic units required for a retaining wall project. The following formulas may also be used for estimation.

Standard Units = Wall Square Footage ÷ 1.66
 Cobble Units = Wall Square Footage ÷ 1.66
 Accent Units = Wall Square Footage ÷ 1.66 x 2

Exposed Wall Height / Length		VERSA-LOK Mosaic Quantity Estimation Table										
		10 feet	12 feet	14 feet	16 feet	18 feet	20 feet	22 feet	24 feet	26 feet	28 feet	30 feet
